The New Wonderful Rochester Peach

Delicious, Juicy Peaches for Everyone; Everywhere

An Eating Peach
A Canning Peach
A Market Peach
A Hardy Peach

**Has Stood 16° Below Zero
and Produced a Full Crop**

**Rapid Growing
Early Bearing
Large Fruit
Often Bears
the First Year**

Rochester Leads Them All

In our estimation ROCHESTER is the greatest peach yet introduced.
Read what our customers write us:

Fred Mills, Grove City, Pa., writes: "While eating some luscious peaches from the trees I purchased from you, I thought possibly you might be interested in these facts. The trees were shipped in April, 1922. From one of the trees this year, we have taken 37 fine large peaches. This tree stands about 11 feet high, the spread of the branches being fully 6 feet, and had it not been for late frosts we would have had easily a peck or more from each tree. We think this is a most unusual occurrence, and believe it speaks unusually well for the quality of trees sent out by your nursery. I might add that the quality of the fruit is wonderfully fine."

Mrs. E. A. Jones, Treasurer Playground and Vacation School Association, Emsworth, Pa., writes: "I want to say that the last Rochester peach tree I got from you is so full of peaches that some of the limbs have broken with their weight, although propped up, and in the future I shall be careful to place my orders with you. I haven't a very large place. Wish I had. I would fill it with Rochester peach trees, for they are certainly the finest I ever saw."

H. R. Howe, Pres. First National Bank, Auburn, N. Y., writes: "Two years ago, I purchased 12 peach trees of you, and I have forgotten what they were, but they are the most wonderful peaches I ever saw. They had a lot of perfect fruit on them last year. I would like to get some more."

C. E. Strawbridge, Lima, Ohio, writes: "On April 10, 1916, I set out one of your new Rochester peach trees. This year we have picked exactly 403 large peaches from this one tree."

Nerville D. Kempe, Civil Engineer, Dayton Savings & Trust Bldg., Dayton, Ohio, writes: "Two Rochester peach trees bought of you last spring are full of blossoms now."

The fruit is described in the "Encyclopedia of Hardy Fruits" by Professor Hedrick, as follows: "Color, orange, yellow blushed with deep dark red; flesh yellow, stained with red near the pit, very juicy, tender and melting; sweet, highly flavored."

Plant one tree, a dozen, fifty or acres. It is a money-maker The best bet in the fruit growing business today. Order your trees now for spring planting. Shipment will be made at the proper time. \$1.00 each; \$10.00 per 12; \$60.00 per 100.

La France Everbearing Raspberries

Medals and first class certificates from Massachusetts Horticultural Society, Horticultural Society of New York, American Institute of Science, and other leading agricultural and horticultural boards.

***Best in Size
Taste and
Productiveness***

La France is a new ever-bearer, producing its first large and delicious fruit in June, another picking in July, still another in August, and still another in September.

**Raspberries on Your Table Four
Months in the Year.**

Raspberries, full of rich, creamy juice, highly flavored and sweet as honey. From June till October, La France produces its delicious fruit. Plants such as we offer you were first sold by the introducer at more than \$1.00 per plant, and thousands of plants were sold at that price—the only raspberry plants we have ever known of in all our experience that sold for so high a price.

***La France is
Different***

We believe our
price is the lowest
it has ever been
sold for.

GEORGE D. SPRANKLE, Tipton, Pa., writes under date of July 27, 1923—"I have on my place here at Tipton many thriving trees, fruit, nut, shade and ornamental, as well as shrubs, which I have obtained from you in the past five years."

***Our Supply is Limited
Order Today***

PRICES WHILE THEY LAST—

**Strong field grown plants, \$3.50 per
12; \$20.00 per hundred.**

Washington Pedigreed Asparagus

Introduced and Developed by United States Department of Agriculture

**Tender
Palatable
Large Size
Rust-Proof**

***Washington Asparagus is in a Class
by Itself***

In size and quality, tenderness, vigor and rust resistance, it is the ideal asparagus for home or market. Fresh Washington Asparagus on your table from your own garden is a delicacy all may now enjoy. The planting and cultivation is simple. Grown commercially—means income.

Cultural Directions for Small Gardens

To make an asparagus bed, prepare a place of fine, loamy soil, to which has been added a liberal dressing of rich manure. For a garden, set in rows eighteen to twenty inches apart, with the plants ten to twelve inches apart in the rows. Make a small mound of the soil, over which the roots should be spread, then cover the plants with about three inches of soil. If planted in the fall the whole bed should be covered before winter sets in with two or three inches of coarse stable manure, which may be lightly forked in between the rows as soon as the ground softens in the spring.

We offer strong, two-year-old roots only, and every plant sold is guaranteed to be of our own growing from pedigreed seed.

Order Now for Spring Planting

Plants will be shipped at the proper time.

PRICES.

\$3.50 for 100 plants; \$30.00 for 1000 plants.

Glen Bros., Rochester, N. Y.

May 4, 1923.

Gentlemen—It is with great pleasure that I again write for one of your catalogues, having ordered from you in 1917 and found every plant highly satisfactory in every respect. Later sold my home, but am again delightfully located and interested in Glen Bros. stock, so please mail at your earliest convenience your catalogue to Mrs. John W. Wood, Box 775, Birmingham, Alabama.

Grow Grapes

*They Work
While You
Sleep*

Delicious eaten fresh, refreshing as grape juice, and grape jelly is enticing

Wherever you go, north, east, south and west, whether on hill or in valley, on poor soil or rich, you will find the grape generously giving of its bounty and loyal to its master whether he give it care or neglect.

Order now for shipment at proper time for planting in the spring.

Prices, strong 2-yr.-old plants.

35c each; \$3.00 per 12; \$25.00 per hundred.

CAMPBELL. Black, pulp tender, rich and sweet.

CONCORD. Black, pulp juicy and sweet; vine very hardy and equally productive.

MOORE. Black, bunches large, berries large, very hardy, earlier than Concord.

BRIGHTON. Red, berries rich wine red, pulp tender almost seedless, juicy, sugary and rich.

CATAWBA. Berries large of a coppery red color, an excellent table and wine grape.

DELAWARE. Light red, pulp juicy, sweet, delicious.

LUCILE. Berries large, rich dark red, pulp sweet and delicious. Indispensable variety for the far north. Should be largely planted.

DIAMOND. White, pulp tender with few seeds, rich, juicy and sprightly.

NAGARA. Berry large, pale yellow, pulp melting, sweet, delightful; strong, very hardy.

If You Plant But One Fruit—Plant Grapes

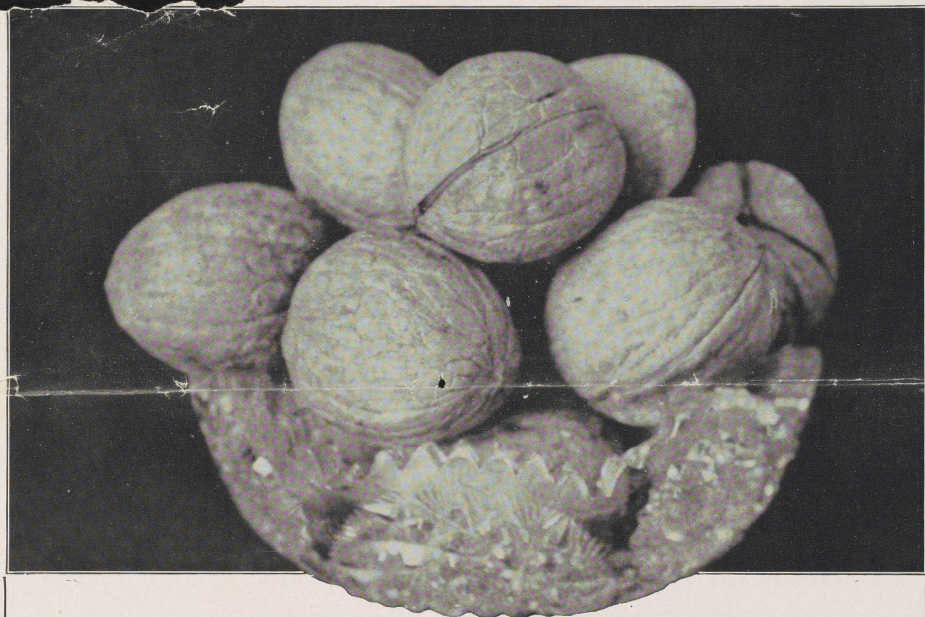

Nothing is better for the money—nothing quite so sure to grow—nothing quite so sure to bear—nothing quite so sure to please every palate.

Planted wherever you can find a spot 6 inches square. It has its likes, but never insists on them. With its roots in any odd nook you can lead it away in any direction to provide a grateful shade for a restful seat.

Glen Cove, Lenhaven, Va.
Messrs. Glen Bros., Rochester, N. Y. Nov. 8, 1922.
Gentlemen: Enclosed please find postal order for 45c, balance which I owe you. I wish to thank you mightily for the trees, etc., which I got from the Express Co. the same day they arrived, and have them all planted nicely. They were certainly a fine lot. R. B. GARRISON.

Northern New York Grown Nut Trees

Grown at Fairport, New York, under severe climatic conditions; they must be hardy.

English Walnuts

Filberts

**We offer the largest stock and largest assortment
of Northern Grown Nut Trees in America.**

Black Walnuts

Butternuts

Come and See Them

Hickorys

Almonds

If you cannot come, order by mail. All orders will receive our careful and personal attention and shipment will be made at the proper time for planting in the spring.

ENGLISH WALNUT. Our trees come into bloom late and thus escape the spring frosts. Nuts are highest quality, sweet and rich in flavor.

| Prices: | Each | 10 | 100 |
|--------------|--------|---------|----------|
| 2-3 ft. | \$1.25 | \$10.00 | \$ 90.00 |
| 3-4 ft. | 1.50 | 12.50 | 125.00 |
| 4-5 ft. | 2.50 | 20.00 | 200.00 |
| 5-6 ft. | 5.00 | 40.00 | 350.00 |

COSFORD FILBERT. (Paper-shell). A highly prized European variety that has won favor wherever grown for its thin-shelled, oblong nut, containing a plump kernel of the richest flavor. Trees are very productive. Layered plants, 2-3 ft., \$1.50 each; \$15.00 per doz.; \$100.00 per 100. 3-4 ft., \$2.00 each; \$20.00 per doz.

AMERICAN BLACK WALNUT. For roadside planting and for reforesting, we have extensive plantings of these valuable trees to offer at the following prices: 3-4 ft., 75c each; \$8.00 per doz.; \$80.00 per 100. 6-8 ft., \$1.25 each; \$12.00 per doz.; \$90.00 per 100. Extra large trees, 8-10 ft., \$3.00 each; \$30.00 per doz.; \$200.00 per 100.

BUTTERNUT (*Juglans cinerea*). One of the finest nut trees, growing occasionally to a height of 100 feet and spreading in proportion. The wood is much valued because of the beautiful finish possible in cabinet work. The large, elongated nuts are rich, sweet, and of delicate flavor; very nutritious. 5-7 ft., \$1.00 each; \$9.00 per doz.; \$60.00 per 100. Extra large specimen trees, 8-10 ft., \$3.00 each; \$30.00 per doz.; \$200.00 per 100.

HARD SHELL ALMOND. Hardy wherever peaches grow; easily grown; tree very showy when in bloom; kernels of nuts large, plump and sweet. 3-4 ft., \$1.00 each; \$10.00 per doz.

SHAGBARK HICKORY (*Carya ovata*). In flavor and quality of kernel the Shagbark is esteemed by most Americans as the choicest of native nuts. Because of the lack of fibrous roots and the formation of the long tap-root, we recommend the planting of small trees. 2-3 ft., \$1.50 each; \$15.00 per doz.

Try growing a few hardy nut trees this spring. Plant them about the house and other buildings, along the walks and drives, along boundary lines and roadsides.

Plant Them for Their Beauty and the Nuts They Bear.

Adolph Grant, 153 East 44th St., New York City, writes under date of September 25, 1923: "The Hard Shell Almond Tree that you sent us some time ago, gave us over 25 pounds of Almonds this year."

Honeysweet Black Raspberry

(Sweet as Honey)

The Berry For the Millions and the Millionaire

There is Millions in it. Grow HONEYSWEET and add One Thousand Dollars or more to your income each year.

Ripens in July - Sweet and Delicious

The Honeysweet is extremely hardy, passing through the severe fruit-tree-killing winters of 1919-1920 and again in 1921 and 1922, without injury to a single twig on any plant in a four-acre patch. Bears every year, it has never been a slacker. Large size, glossy, black, delicious berries retailing on local market at 40¢ per quart. One solid quart of delicious fruit has been picked from nine stems on one branch from a single plant. Many clusters of these big black Raspberries literally cover a bush.

Grow it for market—grow it for your own table. The Honeysweet will do all you expect of it and more. Our strong, sturdy, two-year-old plants will produce fruit the first season planted.

Glen Bros.,

Detroit, Mich.

Gentlemen:—Will you kindly mail me a catalog of your Berry Bushes and Fruit Trees, as I am wanting to get good stock for our lake home.

Your name was given me by one of your customers, George Gross, Pontiac, Michigan; who says you can be depended upon.

Sincerely, MRS. C. D. SMITH.

ROCHESTER

New York

Syringa.

Hydrangea.

Forsythia.

6 Big Shrubs \$2.50

Grouped or planted individually on the lawn, along the drive, about the foundation of the house, as a screen anywhere and everywhere, they are effective, attractive, but inexpensive.

SPIREA VAN HOUTTEI. Grows about 6 feet high with arching branches, dark green leaves, and numerous clusters of white flowers.

SPIREA ANTHONY WATERER. Compact, free-flowering variety, upright branches, bearing a rich profusion of bright crimson flowers in dense corymbs. Blooms till late autumn.

HYDRANGEA. The hardiest and most popular Hydrangea, it has greater adaptability to climatic variations than the others, and in July and August its passive plumes of pink flowers bend the branches with their weight.

HONEYSUCKLE. Large, half evergreen shrub, with long, slender, recurving branches and bright green broadly ovate leaves; flowers creamy white or light yellow, fragrant, expanding early in spring. Very desirable.

SYRINGA. Hardy, vigorous, upright-growing shrub, with arching branches; large, handsome foliage; flowers fragrant, pure white or cream-white in dense racemes. An old favorite.

FORSYTHIA. Graceful shrub, with branches drooping to the ground, where they often take root; the branches are literally covered with the golden yellow flowers in early spring before the leaves appear. Good cover for steep slopes, walls, fences and arbors.

All Old-fashioned Shrubs, but None Prettier Have ever been Grown

It is due only to our immense stock that we can make this remarkably low price. The plants are strong, bushy and well rooted. Regularly sold at 75c each; \$7.00 per doz.

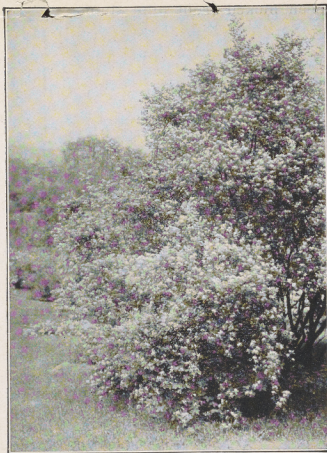

We Will Accept Your Order For This Collection of Six for \$2.50

George Kennan, Medina, New York, writes: "The shrubs and vines ordered from you last fall were in all respects the best lot of shrubs that I ever had from any source. I was immensely pleased with them. You may count on getting all my orders for the shrubs, trees and plants that you carry in stock."
